

ON TIME

TELLS YOU WHEN THE POWER IS OFF SO YOU CAN KEEP EVERYTHING ON TIME.

Be ON TIME taking care of poultry and livestock when a power outage occurs.

Be ON TIME taking care of greenhouses to provide supplemental heating and ventilation.

It reminds us to reset our clocks for lighting, feeding, and watering so they will be ON TIME.

Power outages can cause you to be late or disrupt your day!

Now there is help.

ON TIME™

- An alarm sounds when the power has been off for 20 seconds or longer.
- Tapping the reset button will put the ON TIME to sleep.
- The ON TIME beeps once every 30 seconds when power is restored.
- When low battery voltage is detected, the ON TIME alarms every 5 minutes, plus it has a light indicating the battery needs to be replaced.

The ON TIME has many uses at home and on the farm.

- You know when poultry and livestock are without ventilation, feed or water.
- You know critical heating and ventilation is not available for greenhouses.
- You know not to depend on AC powered alarm clocks.
- You will know when to reset your AC powered clocks.
 1. On your alarm clock
 2. On your feeders, lights, VCR, DVD, etc
 3. On your microwave and ovens
- You know when the refrigerator and/or freezer power is off or has been off.

The ON TIME has many uses at the work place.

- You know to check computers for damage that may have occurred overnight.
- Time clocks need to be reset.
- Your clocks for outside lighting and/or lawn watering system need to be reset.
- Phone systems need to be tested since the electronics were shut down.
- Check security and fire alarm system batteries to see they have recovered from the power outage.
- Check all battery backup systems for computers and emergency lighting.
- Check refrigeration and cooling systems for proper operation.
- Check everything that is susceptible to lightning damage since lightning causes many power outages.
